### DETAILED ACTION

1. In view of the appeal brief filed on 12/16/02, PROSECUTION IS HEREBY REOPENED. New grounds of rejection are set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

- (1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,
- (2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 2-3, 5-7, 10-14, 23-24 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Palm in view of McCurry et al.

Palm discloses the invention including a lever 52, a locking member 48, a first end 54, a second end, a plurality of teeth (Fig. 5), a retainer member 22 supported by the housing and

Art Unit: 3724

defining a channel 28 and a slot (Fig. 1). Palm does not show the lever engages the first and second ends of the locking member, first and second openings (Fig. 4). However, McCurry teaches the use of a lever engaging the first and second ends of the locking member (Fig. 3) for the purpose of providing a quick release of the blade. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Palm's device by providing the lever as taught by McCurry in order to obtain a quick release of the locking member.

#### ***Allowable Subject Matter***

3. Claims 28-30 are allowed.
4. Claims 8-9 and 25-26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Junghans, Axtell, Russell, Gehrie, Wilson, Darbo et al., Quirijnen, Neubert et al., Tanaka et al., Dyke et al. are cited to show related device.
